User Password Expiration Reminder supports a huge number of users and works with all types of categories as well as regions. User Password Expiration Reminder has the ability to track any given user against the organization policy and can detect any violation. User Password Expiration Reminder allows you to also analyze, track and detect users with soon to expire passwords in real-time and

User Password Expiration Reminder is designed to eliminate the problem of ‘password expiration’. ‘User Password Expiration’ occurs when the password of the user expires during the use. It is inevitable in some companies as they have different password expiration policy. User Password Expiration Reminder Features: User Password Expiration Reminder Features User Password Expiration Reminder is an easy to use application that is designed to help you detect and manage all password expiry issues in your company for its end users. With the help of User Password Expiration Reminder, you have the possibility to analyze, track and detect users with soon to expire passwords and automatically allow you to send them notification e-mails. The software is a simple to use application that sends e-mails to you by using your own domain. User Password Expiration Reminder allows you to manage user password expiration on a user by user basis. If a user logs in to the system but does not change the password after expiry, he is registered as an expired user. Moreover, a user who has his account locked for being an inactive user, cannot log back to your system when he will attempt to change his password. When such a user attempts to change his password he will be notified by e-mail. He will be also informed what reasons he has been locked for. User Password Expiration Reminder includes: 1. User Registration 2. Auto-detection of the soon to expire passwords 3. On-user-based E-mails 4. Password Policy User Password Expiration Reminder Licensing: User Password Expiration Reminder Licensing: License keys are email based. Each email will be assigned a unique key. Each key contains an activation code which will be activated with the user registration. If you want to allow multiple users to use your application, just distribute multiple license keys. You have full control over your licensing system. Conclusion: User Password Expiration Reminder is a complete solution that enables you to manage all the password expiration issues as it keeps both administrator and the end user informed about their password status. With the help of User Password Expiration Reminder, you have the possibility to analyze, track and detect users with soon to expire passwords and automatically allows you to send them notification e-mails. User Password Expiration Reminder is a complete solution that enables you to manage all the password expiration issues as it keeps both administrator and the end user informed about their password status.
